

Weekly update – Y5 Ock Class

Wc 6th March

PE

In PE this week we have been practicing our brilliant backhand shot in tennis – the children have mastered this skill really well. Lots of them have challenged themselves to increase their speed and power when hitting the tennis ball. We completed a game of doubles using only the backhand shot, we found this super tricky but it got us thinking about how we need to use all of the different shots in tennis!

Science

This week in Science we have been thinking about the solubility of different sugars. We have taken lots of different types of sugar and created our own investigations based on the question 'Which sugar dissolves the quickest?'. We thought carefully about our different variables and the things we would need to keep the same to ensure it was a fair test. We found that the icing sugar dissolved the quickest – the children thought that this might have been due to the granules being so small.

Science

Snow!!

We have had lots of fun in the snow this week!
